### SUMMARY

Self-driven MEAN Stack Developer with 4+ full-stack web projects built using Angular, Node.js, Express.js, and MongoDB. Skilled in designing modular UIs, building secure REST APIs, and implementing real-world features like authentication, dashboards, and role-based access. Daily GitHub contributor.

Currently expanding into Data Structures in Java and foundational Machine Learning.

### EDUCATION

**Bachelor of Computer Applications (BCA)** – Dr. RML Avadh University – (2023–2025)

**12th** – R.B.N Inter College, UP Board (2022): 56.6%

**10th** – R.B.N Inter College, UP Board (2020): 73.6%

### SKILLS

- **Frontend:** Angular 19, HTML5, CSS3, Bootstrap, TypeScript, JavaScript
- **Backend:** Node.js, Express.js, JWT, REST APIs, Middleware
- **Database:** MongoDB, Mongoose
- **Tools:** Git, GitHub, Postman, Firebase, VS Code
- **Languages:** JavaScript, TypeScript, Python (basic), C (basic), Java (basic)
- **Others:** Data Structures & Algorithms (DSA), Machine Learning (learning), AI Integration (learning)

### PROJECT

#### E-Learning Platform :

Course management app for online education | [GitHub](#)

- Angular frontend + Node/Express backend with MongoDB
- Features: video lessons, student enrollment, progress tracking, admin dashboard
- JWT authentication with secure routing

#### E-Commerce Website

Shopping app with product filtering and cart | [GitHub](#)

- Custom-built frontend using Angular and Bootstrap
- Backend includes user login, cart, and order tracking
- MongoDB for dynamic data handling

#### Spotify Clone

Responsive UI replica of Spotify | [GitHub](#)

- Frontend-only project with Angular and Bootstrap
- Simulated playlists, album previews, and media controls

#### Hirenet – Decentralized Job Finder

Full-stack job platform connecting seekers & employers | [GitHub](#)

- Built with Angular, Node.js, Express, and MongoDB
- Features: job posting, JWT auth, role-based access, resume upload
- Designed for scalable user management and real-time tracking

### KEY ACHIEVEMENTS

- Built 4 full-stack web apps independently
- Active GitHub contributor with daily commits and project updates
- Currently learning Data Structures & Algorithms in Java and basics of Machine Learning
- Passionate about scalable app architecture and clean UI/UX
